Univ of Wisconsin
Madison, Wisconsin

Dear Josh,

Slant of B₂, start
all other T phages on its
way.

I've been keeping stocks
simply by placing slants in
deep freeze. Recovery seems
good. But if there were
a power failure we'd have
a lot of slants to make.

I'm interested in hearing
about the silica technique.

Roger will be here
Thursday and then I think
he's going to visit you.
Can we send anything with
him?

Szilard also heard from
